SDRXD-1

RANGE OF APPLICATION:

Module for receiving data on the video line of our transmitter modules SDTXD-1 and SDTXD-2. Forwarding of the data via a serial interface.

SDRXD-1

- binary data receiver via a video line
- 1x video input, 1x video output
- video clamping, data slicer with adjustable threshold
- firmware demodulation
- serial data interface output TTL, LVTTTL, RS232, RS485
- 48-pin bus connector
- supply voltage 5VDC
